1 **EC TYPE-EXAMINATION CERTIFICATE**

2 Equipment intended for use in Potentially Explosive Atmospheres Directive 94/9/EC

3 Certificate Number: **Sira 02ATEX2103X** Issue: **8**

4 Equipment: **Pulsar dB Series of Ultrasonic Transducers**

5 Applicant: **Pulsar Process Measurement Limited**

6 Address: Cardinal Building
Enigma Commercial Centre
Sandy's Road
Malvern
Worcestershire
WR14 1JJ
UK

7 This equipment and any acceptable variation thereto is specified in the schedule to this certificate and the documents therein referred to.

8 Sira Certification Service, notified body number 0518 in accordance with Article 9 of Directive 94/9/EC of 23 March 1994, certifies that this equipment has been found to comply with the Essential Health and Safety Requirements relating to the design and construction of equipment intended for use in potentially explosive atmospheres given in Annex II to the Directive.

The examination and test results are recorded in the confidential reports listed in Section 14.2.

9 Compliance with the Essential Health and Safety Requirements, with the exception of those listed in the schedule to this certificate, has been assured by compliance with the following documents:

EN 50014:1997 plus Amendments 1 and 2 EN 50020:1994 EN 50284:1999

10 If the sign 'X' is placed after the certificate number, it indicates that the equipment is subject to special conditions for safe use specified in the schedule to this certificate.

11 This EC type-examination certificate relates only to the design and construction of the specified equipment. If applicable, further requirements of this Directive apply to the manufacture and supply of this equipment.

12 The marking of the equipment shall include the following:

II 1GD
EEx ia IIC T6 (Tamb = -40°C to +75°C)

Project Number 52A19911
C. Index 13

13 **DESCRIPTION OF EQUIPMENT**

The Pulsar dB Series of Ultrasonic Level Sensors are designed as level measurement sensors used in level measurement systems. The sensors in the series differ only in the size of transducer crystal used and the frequency of operation.

The equipment comprises a printed circuit board and a piezo electric crystal transducer, these are all housed inside a plastic enclosure and then totally encapsulated. An integral cable provides the connection facilities to the external circuits.

The equipment has been assessed with the following input parameters:

Ui	=	30 V
Ii	=	0.6 A
Pi	=	1.5 W
Ci	=	0
Li	=	0

Variation 1 - This variation introduced the following changes:

i. To permit the dB Series of Ultrasonic Transducers to be extended to include the model dB25.
ii. To allow the amendment of the label to include additional information that is not ratified by Sira.

Variation 1 to certificate issued 9 February 2004 - This variation introduced the following change:

i. To recognise the inclusion of the Model dB40 into the range of Pulsar dB Series of Ultrasonic Level Sensors.

Variation 2 to certificate issued 9 February 2004 - This variation introduced the following changes:

i. The recognition of modifications to the printed circuit board (PCB) for form a dB Mk2 circuit board.
ii. To permit the use of the dB Mk2 circuit board in all previous models within the dB series of Ultrasonic Level Sensors.
iii. The inclusion of the Model dB6 Mk2, standard, and the dB6 Mk2, threaded nose versions into the range of Pulsar dB Series of Ultrasonic Level Sensors.

Variation 3 to certificate issued 9 February 2004 - This variation introduced the following changes:

i. The introduction of minor changes to the printed circuit board and parts list.

Variation 4 to certificate issued 9 February 2004 - This variation introduced the following changes:

i. To allow the enclosure used in the construction of the sensor to be made from an alternative, plastic material.

Variation 5 - This variation introduced the following changes:

i. The Bill of Material drawings were modified to recognise:
   - The re-specification of suppliers, identification numbers, package types, ratings, operating temperatures etc. applicable to specified component parts.
   - The removal of specified component parts.
   - Certain specified component parts were allowed to be optional.
   - The addition of a new Bill of Material drawing.
ii. The recognition of minor label drawing modifications; these changes are administrative and do not apply to the aspects of the product that are relevant to explosion safety.

14 DESCRIPTIVE DOCUMENTS

14.1 Drawings

Refer to Certificate Annexe.

14.2 Associated Sira Reports and Certificate History

Issue	Date	Report/File No.	Comment
0	4 July 2002	R52A8397A	The release of the prime certificate.
1	20 September 2002	52A9361	The introduction of variation 1.
2	19 November 2002	R52A8397B	Re-issued to permit report number R52A8397A to be replaced by report number R52A8397B
3	9 February 2004	R52A11029A	Re-issued to permit the incorporation of variation 1 dated 20 September 2002 and to allow the stainless steel sleeve used in the dB3 transducer housing to be replaced by a new lower housing moulding
4	28 April 2004	R52A11496A	The introduction of Variation 1 to certificate issued 9 February 2004.
5	04 June 2004	R52A11731A	The introduction of Variation 2 to certificate issued 9 February 2004.
6	23 September 2004	V52A12446A	The introduction of Variation 3 to certificate issued 9 February 2004.
7	18 May 2005	R52A11707A	The introduction of Variation 4 to certificate issued 9 February 2004.
8	13 May 2009	R52A19911A	This Issue covers the following changes: • All previously issued certification was rationalised into a single certificate, Issue X, Issues 0 to X-1 referenced above are only intended to reflect the history of the previous certification and have not been issued as documents in this format. • The introduction of Variation 5.

15 SPECIAL CONDITIONS FOR SAFE USE (denoted by X after the certificate number)

15.1 Under certain extreme circumstances, the non-metallic parts incorporated in the enclosure of this equipment may generate an ignition-capable level of electrostatic charge. Therefore, when it is used for applications that specifically require group II, category 1 equipment, the equipment shall not be installed in a location where the external conditions are conducive to the build-up of electrostatic charge on such surfaces. Additionally, the equipment shall only be cleaned with a damp cloth.

16 **ESSENTIAL HEALTH AND SAFETY REQUIREMENTS OF ANNEX II** (EHSRs)

The relevant EHSRs that are not addressed by the standards listed in this certificate have been identified and individually assessed in the reports listed in Section 14.2.

17 **CONDITIONS OF CERTIFICATION**

17.1 The use of this certificate is subject to the Regulations Applicable to Holders of Sira Certificates.

17.2 Holders of EC type-examination certificates are required to comply with the production control requirements defined in Article 8 of directive 94/9/EC.
